Phenomenal User Experience

Swimage enterprise automation solutions provide efficiency for support techs and end users, allowing both groups to save time and effort on PC maintenance and migrations.

Swimage solutions also offers 100% process resiliency - providing the trust that any use case implemented will never fail, resulting in extraordinary experiences. The Swimage conductor is the engine that drives automation and is unbreakable.

With zero-touch automation, users have the ability to schedule an overnight solution, or complete it during break/lunch. The need to ship PCs or the potential nightmare of losing data and productivity is a non-issue with Swimage.

Whether users are migrating, upgrading an OS, or experiencing a BSOD - Swimage will care for it, and all while keeping the PC fully encrypted.

Swimage continues to accelerate innovation and has just released version 10.2. A roadmap overview is at the end of this newsletter, which highlights the features and new enhancements.

Empower Remote Productivity

Swimage prioritizes efficiency and user productivity by enabling self-service capabilities for remote workforces - no matter how remote. Swimage unlocks capabilities for OS repairs, OS upgrades, migrations, and more. Remote users are enabled to provide rapid and reliable solutions via self-service instead of relying on helpdesk support for resolution of various common PC challenges. Most importantly, remote workforce experiences are consistently extraordinary.

Overall process quality and speed is drastically enhanced through rapid and reliable AI automation technology. Increased production outputs are the result of Swimage automation. PC issues that commonly result in productivity downtime are drastically reduced. Additional advantages include higher employee productivity rates, more efficient use of IT support time, improved resiliency, and shorter support labor trends.

Swimage offers simplified setup and provisioning - along with touchless, fearless and accelerated migration and deployment processes. Remote workforces have the ability to initiate various solutions with a single touch. The remainder of the process is completely hands free, with completed solutions in approximately 1-2 hours.

Whether the user is remote or on-premise, Swimage creates huge positive impact.

4 Amazing Swimage AI Statistics

On average, enterprise organizations that use Swimage automation solutions experience the following:

- Reduce user downtime by 80%
- Reduce PC shipping costs by 90%
- Reduce support & tech costs by 95%
- Increase throughput by over 200%
