

Distributable, self-contained migration solution	Swimage	Autopilot
Handles all remote worker deployment scenarios	✓	✗
Can execute end-to-end without user or technician involvement	✓	✗
Can update local content in the background	✓	✗
Can execute completely offline	✓	✗

Use Intelligent Automation to ensure success	Swimage	Autopilot
Logically determines each step and takes action for desired results	✓	✗
Rollback to pre-deployment state at any time if needed	✓	✗
Flexible configuration to handle any deployment scenarios	✓	limited
Fully functional out-of-box	✓	✗
Very simple to manage and customize	✓	✗

Ensure a successful deployment before it starts	Swimage	Autopilot
Execute a full deployment dry-run to validate components are healthy	✓	✗
Find and repair any common issues automatically	✓	✗
Remove/change components to eliminate any process interference	✓	✗
Confirm the PC meets success criteria before the deployment begins	✓	✗
Fully customizable health checks and remediation	✓	✗
Report to central web portal automatically	✓	✗

Keep all data fully encrypted	Swimage	Autopilot
Automatically detect encryption type on the drive	✓	Bitlocker only
Perform all tasks needed to keep the drive encrypted	✓	✗
Convert the encryption from one vendor to another with security	✓	✗

Easily ensure all PCs have proper configuration	Swimage	Autopilot
Use templates to define groups, locations, departments, etc.	✓	✗
Use intelligent automation rules to configure PC attributes	✓	✗
Mass import records to the web console from a simple spreadsheet	✓	✗

Define all PC attributes for “known good” configuration	Swimage	Autopilot
Manage configuration sets through Roles and Templates	✓	✗
Add or remove any Windows 10 features and components	✓	✗
Define the specific deployment scenario and custom workflow engine	✓	✗
Configure disk formatting options	✓	✗
Assign applications in Roles & Templates, individually or app matched	✓	✗

Ensure no data is ever lost and is always recoverable	Swimage	Autopilot
Execute a full drive snapshot on the drive before it's migrated	✓	✗
Use automation to pick optimal location to store & transfer data	✓	✗
Support of local, server, direct, external drive, or cloud for data storage	✓	✗
Migrate PC data directly over network, Wi-Fi, or connected patch cable	✓	✗
Migrate any and all data, settings, profiles and application information	✓	✗
Ability to recover/restore data potentially missed in migration rules	✓	✗

Efficiently manage all hardware drivers	Swimage	Autopilot
Define and assign any driver to any systems	✓	✗
Extract drivers from live systems, folders, or driver packs	✓	✗
Create driver assignments from applications	✓	✗
Store driver libraries without driver duplication	✓	✗

Include any application in the deployment job	Swimage	Autopilot
Include applications from multiple sources	✓	✗
Support your existing business critical legacy application	✓	✗
Define application installation order per application	✓	✗
Configure Application matching rules using basic & regular expressions	✓	✗

Centralized configuration & reporting	Swimage	Autopilot
Manage modern PC management from a single on-line console	✓	✗
Import PCs in bulk volumes w/configurations customized per system	✓	✗
Define the configuration of a customized base image	✓	✗
Create workflow tasks for deployment jobs	✓	✗
Create Roles and Templates for system configuration	✓	✗
View real-time deployment activity	✓	✗
Define and configure individual deployment parts	✓	limited
