

Flexibility: The Key to Success in Technology

Swimage Monthly Newsletter

Taking a More Flexible & Efficient Approach to Windows Deployment

Whether your current OS is Windows 7, Windows 10, and/or you are preparing for the launch of Windows 11, OS upgrades are a continuous cycle. What is your current build process?

Large costs are often a result of manual Windows device deployment processes. This is due to high levels of overhead in relation to PC imaging, re-imaging, supporting infrastructure/network, applications, drivers, and data.

Without the requirement of third party services, Swimage automation provides organizations with flexible solutions and total control of device configurations. Optimizing and modernizing PC lifecycle management without capability gaps will quickly drive down costs in engineering, infrastructure, and support.

MIGRATE FROM ANYWHERE WITH SWIMAGE

LATEST RELEASE: SWIMAGE + TRANXITION RANSOMWARE RECOVERY

Swimage Offline Deployment Method

Has your organization ever experienced PC deployment challenges in assisting remote or hybrid employees who have poor or no internet connection? The Swimage Offline Deployment Method (ODM) is designed to assist everyone – from employees in large offices with thousands of systems to be deployed simultaneously to remote workers in all locations, even on mountain tops. The Swimage ODM eliminates concerns surrounding network impact and limited bandwidth.

The goal of delivering the ODM to a PC is to optimize time, speed, and reliability. Delivery options include:

- Over-the-network
 - Cloud streaming
 - ISO format
 - OEM vendor image
 - Swimage kit (USB thumb drive)
-

Migrate from Anywhere with Swimage

Position Your Remote & Hybrid Workforces for Success

Swimage provides employees with the capability to completely migrate a PC from anywhere, typically in under an hour. This allows for employees to migrate themselves without the requirement of shipping the PC to a repair center. No longer should a user wait for IT support or shipping times to get their PC repaired, upgraded, or migrated from remote locations.

Maintaining productivity and security while providing the flexibility that employees need to get their done at home, office, or any other location has never been easier.

- Maintain productivity for office, hybrid, & remote employees
- Maintain security so that data and access to IT systems are protected
- Maintain awareness with real time activity visibility for leadership and support teams

Latest Release: Swimage + Tranxition Ransomware Recovery

Swimage + Tranxition has recently announced a ransomware recovery solution to recover systems that have been blocked by malware or ransomware. The solution allows "point-in-time" recovery even if the system is unavailable.

Swimage is proud to provide a special offer to existing customers - a complimentary trial of Swimage + Tranxition Ransomware Recovery.

Contact us today and take advantage of this limited time special promotion.
